NVNT

Unique expertise

Andre Venter is an accomplished senior executive and a founding member of NVNT Consulting.

He provides advice on enterprise strategy formulation and realisation; helping companies

- operationalise their strategy,
- strengthen their competitive position,
- increase market share, customer satisfaction and expenses.

Contributing ideas that work

Mr. Venter brings more than 28 years of experience in the Digital Economy.

He has a solid commercial background combining technical, business and financial expertise to develop effective solutions for clients.

He is experienced in business process re-engineering and total quality management to improve customers' business performance.

Mr. Venter has developed a differentiating capability to establish purpose driven organisations through the bespoke use of foundational enterprise transformation methods and practices.

Since 1990, Mr. Venter has initiated and directed numerous large enterprise programs of work. Among his most recent accomplishments, he provided strategic guidance to a major South African telecommunications company, enabling their short term cost optimisation and ultimate business transformation. As a result, the client was equipped to finalise their transformation initiative.

Experience that brings insight

Mr. Venter spent many years in C-level roles, gaining extensive experience and insight on what it takes for modern day enterprises to succeed, and did so in multiple industry segments i.e. automotive, petroleum and gas, health services, local government, commodity trading, industrial engineering and manufacturing, financial services, information technology and professional services.

Core to the success and value of any strategy – are specialists who understand the business needs of an organisation and who can deliver appropriate solutions, while managing the impact thereof.

Above all - this is Andre's greatest passion and strength: realising business strategy and improving business performance based on the principles of customer focus, stakeholder value and process management.

Key practises he applies across enterprise functional areas include continuous and breakthrough improvement, preventative management and fact-based management.

Industry Influence

Mr. Venter served on international enterprise boards, MIBS and AFSUG and acts on invitation as an executive advisor to enterprises.

Proficiencies and certifications

His most frequently used skills include - but are not limited to:

- Strategy Origination and Realisation, Enterprise Program Management, (Value Realisation)
- Process Management (Enterprise Architecture),
- System Development Life Cycle methods (e.g. Agile, Lean, Six Sigma, Waterfall, V-Model) and
- Enterprise Integrated Change Management – eICM

while remaining focused on the perfect blend of:

- Process,
- Resources (Human, Financial, etc.), and
- Technology.

Innovation Through Collaboration
